

SPARK™ Defensive Driving Course

The Defensive Driving Course – an event organized by SPARK Car Care™ was held on 1st and 2nd March 2013.

20 participants have registered themselves for this exciting course. The course was split into two sessions, theory and practical, which we strongly believe it was beneficial to our participants. You must be wondering what was the purpose of having a theory session?

All participants have unanimously reached the same consensus that the theory session has better equipped them with the knowledge on the functions of the car and tyres that may help to save their life during critical situations. The theory session had also prepared them for the practical lesson on the next day.

The most exciting highlight of the course was the practical session which was held at Kranji Turf Club. Despite the theory session ended late the night before, each and every participant still came with high spirits and was fully prepared to put the theory into live action. Here were the stunts which the participants had mastered:

- Emergency Braking
- Collision Avoidance
- Understeer Recovery & Emergency Braking in a Corner
- Oversteer Recovery and Slalom
- Handbrake Turn
- Reverse Flick

Although it was raining cats and dogs towards the end of the session, this had not dampened the spirit of the participants and everyone was having a good time! It has been a great honour to receive positive comments from our participants and we look forward to the next gathering with them.

Thank you Sponsors for making this event successful and memorable.
